

MESOESTETIC

Are you having skin problems? Skin dryness, acne, and wrinkles on your face? These are everyday skin problems most people face.

Since 1984, Mesoestetic has been a worldwide brand. It provides treatments for depigmentation, acne and anti-ageing skin problems and home care products with maximum active ingredients concentration.

What is Mesoestetic?

Mesoestetic offer a wide range of in-clinic treatments and homecare products that have been rigorously tested and endorsed by scientific studies and conform to the highest safety standards.

Doctors, professional aestheticians and patients in more than 90 countries trust Mesoestetic's highly-effective products and their 35 years' experience in the medical and aesthetics industry.

Their range comprises comprehensive solutions for the main issues facing aesthetic professionals today. These include pigmented skin, signs of ageing, acne and scarring as well as products for sensitive skins and those suffering with different forms of Rosacea.

Mesoestetic is a medical-aesthetic brand. It was established in 1984 by Joan Carles Font and M José Almansa.

Joan and Almansa realized the low quality of anti-aging and other aesthetic products in the market.

After thorough research and analysis, the two came up with a medical-aesthetic company. Their products answered specifically to each skin concern and home care products.

How do Mesoestetic products work?

Mesoestetic products- help to revitalise the skin and promote glowing completions.

Each product plays a unique role in encouraging and promoting skin smoothness.

Each kit contains all the products you need to treat specific skin types.

Home care is not an option, but a necessity, for results.

Home care is the most important part of the treatment process.

Cosmelan

Cosmelan is a depigmenting treatment. It works to eliminate or reduce dark spots and acne scars.

Cosmelan Depigmentation Peel can treat all types of pigmentation including hormone-induced pigmentation such as: melasma, chloasma and superficial pigmentation like sun damage, freckles, dark spots.

Cosmelan Depigment Treatment Plan:

Using Cosmelan for 2 to 3 months helps regulate the overproduction of melanin. It works by limiting the number of melanocytes cells, controlling your skin's intercellular production, and prevents re-pigmentation.

Consequently, Cosmelan reduces the ongoing of dark spots . It does so with the help of spot phase formation preventive ingredients, giving you a long-lasting glowing complexion.

Individuals with dark spots, reduced skin tone, and lack of skin luminosity need an aesthetic like Cosmelan Peel.

Cosmelan peel is designed to eliminate dark spots. It also improves skin tone and enhances skin luminosity.

It is ideal for eliminating dark spots originating from melanin overproduction.

Cosmelan 1

Cosmelan 1 is a skin depigmentation mask. It works with the help of active ingredients to prevent acne, Hyperpigmentation, and freckles caused by sun damages and other elements.

It helps achieve clear and even complexion on most skin types and enhance skin radiance. This mask is applied in clinic.

Cosmelan Cream

Cosmelan cream is a depigmentation cream suitable for the entire face. The cream helps maintain skin radiance and clarity by softly removing sunspots, freckles, wrinkles and fine lines. It works with the help of glycerin ingredients leading to a glowing complexion. This cream is for homecare use.
